BOUSTEAD AWARDED RECORD S\$300M CONTRACT TO DESIGN AND BUILD NEW TOWNSHIP IN LIBYA

Singapore, 22 August 2007 – Mainboard-listed Boustead Singapore Limited (“Boustead”), a progressive global engineering services and geo-spatial technology group today announced that it has been awarded a record S\$300 million contract to design and build a new township in Libya, together with joint venture partner, General Construction & Building Company (“GCBC”), the largest government construction company in the country. According to the terms of the joint venture, Boustead will hold a 65% interest in the contract.

Boustead-GCBC will design and build the new township with 1,164 single-storey semi-detached houses and supporting infrastructure at a 465-hectare site in the municipality of Al Marj. The new township includes amenities such as municipal water supply and sewage systems, education institutes and recreational facilities. Utilising Boustead’s advanced pre-cast system and propless framework system for construction, the new township project is expected to be completed within 24 months. The advanced pre-cast system has been adapted to incorporate a modern Arabic architectural façade that complements the cultural flavour of Libya.

Boustead-GCBC will appoint Surbana International Consultants Pte Ltd (“Surbana”) as the main consultant, marking Surbana’s foray into Libya. Surbana will contribute its vast expertise in new township planning, having designed and developed 26 townships in Singapore which provide quality homes for more than 85% of Singaporeans.

Mr Wong Fong Fui, Chairman and Group Chief Executive Officer of Boustead said, “We are absolutely honoured to play such an important role in the development of a new township in Libya. Libya is a market where we have traditionally enjoyed great success and the award of the record S\$300 million contract affirms this. The contract is set to nearly double our current group order book.”

Mr Wong added, “We are excited to be cooperating with a strong joint venture partner, GCBC. GCBC will enhance this new township project with its complementary capabilities in civil engineering as the largest government construction company in Libya. We are looking forward to fostering a fruitful relationship with GCBC, which marks our long-term cooperation on infrastructure projects in Libya. As for Boustead, this new township project is an extension of our strong set of infrastructure engineering capabilities, which we are able to offer to developing nations.”

Said Mr Chong Lit Cheong, Chief Executive Officer of International Enterprise (“IE”) Singapore, “We are especially heartened by Boustead’s efforts to work with other Singapore companies such as Surbana, to participate in this mega project, which will lead to the transfer of Singapore’s software and experience in urban infrastructure and urban water management to Libya. This is in line with IE’s efforts to promote alliance formation among local companies and the export of Singapore’s leading services

sectors.” This new township project was concluded following an IE-organised business mission to Libya led by Foreign Minister George Yeo in May 2007.

On further prospects in Libya, Mr Wong commented, “This new township project is part of the government’s long-term national plans to construct 400,000 houses in the country over the next decade. We foresee further participation in this sector in the future. Additionally, with our infrastructure engineering capabilities in three key areas – energy, water and real estate – we believe that we can offer much more in the development of infrastructure for Libya.”

Having undertaken several major water and wastewater engineering projects in Libya in the past, Boustead maintains a well-established presence and excellent reputation in the North African nation. Currently, Boustead’s subsidiary, Salcon Pte Ltd is in the final stages of completing the largest sewage treatment plant in Libya. Adding onto its achievements in Libya, Boustead will now be the first Singapore company to design and build a new township in the country.

The contract is expected to have a positive material impact on the profitability, earnings per share and net asset value per share of Boustead in its current financial year ending 31 March 2008 and next financial year ending 31 March 2009.

About Boustead Singapore Limited

Established in 1828, Boustead Singapore Limited is a progressive global Engineering Services and Geo-Spatial Technology Group listed on the Singapore Exchange. Offering an extensive range of specialised engineering services and geo-spatial solutions, we deliver professional answers customised to meet our clients' specific requirements in a vast array of industries.

Our strong suite of Engineering Services is geared to fulfil the stringent demands of specialised engineering fields such as:

- Energy-Related Engineering;
 - Oil & gas/petrochemicals;
 - Solid waste energy recovery;
- Water & Wastewater Engineering; and
- Industrial Real Estate Solutions.

Under our Geo-Spatial Technology arm, we provide consulting services and exclusively distribute ESRI geo-spatial technology – the world's leading geographic information systems and geo-spatial solutions – to major markets across Australia and South East Asia.

With a vast global network stretching across Asia, Australia, Europe, Africa and the Americas, Boustead is ready to serve the world. Boustead has undertaken projects in 72 countries globally.
